Citation indices	All	Since 2012
Citations	22356	15883
h-index	75	64
i10-index	428	339

Title	1–20	Cited by	Year
Influence of the modulation method on the conduction and switching losses of a PWM converter system	JW Kolar, H Ertl, FC Zach IEEE Transactions on Industry Applications 27 (6), 1063-1075	456	1991
A novel three-phase utility interface minimizing line current harmonics of high-power telecommunications rectifier modules	JW Kolar, FC Zach IEEE Transactions on Industrial Electronics 44 (4), 456-467	406	1997
Novel three-phase AC–AC sparse matrix converters	JW Kolar, F Schafmeister, SD Round, H Ertl IEEE Transactions on Power Electronics 22 (5), 1649-1661	365	2007
Novel three-phase AC-DC-AC sparse matrix converter	JW Kolar, M Baumann, F Schafmeister, H Ertl Applied Power Electronics Conference and Exposition, 2002. APEC 2002 ...	336	2002
An isolated three-port bidirectional DC-DC converter with decoupled power flow management	C Zhao, SD Round, JW Kolar IEEE transactions on power electronics 23 (5), 2443-2453	316	2008
A review of control and modulation methods for matrix converters	J Rodriguez, M Rivera, JW Kolar, PW Wheeler IEEE transactions on industrial electronics 59 (1), 58-70	300	2012
Review of three-phase PWM AC–AC converter topologies	JW Kolar, T Friedli, J Rodriguez, PW Wheeler IEEE Transactions on Industrial Electronics 58 (11), 4988-5006	282	2011
SiC versus Si—Evaluation of potentials for performance improvement of inverter and DC–DC converter systems by SiC power semiconductors	J Biela, M Schweizer, S Waffler, JW Kolar IEEE transactions on industrial electronics 58 (7), 2872-2882	261	2011
PWM converter power density barriers	JW Kolar, U Drofenik, J Biela, ML Heldwein, H Ertl, T Friedli, SD Round Power Conversion Conference-Nagoya, 2007. PCC'07, P-9-P-29	259	2007
Design and implementation of a highly efficient three-level T-type converter for low-voltage applications	M Schweizer, JW Kolar IEEE Transactions on Power Electronics 28 (2), 899-907	229	2013
Efficiency-optimized high-current dual active bridge converter for automotive applications	F Krismer, JW Kolar IEEE Transactions on Industrial Electronics 59 (7), 2745-2760	218	2012

Title	1–20	Cited by	Year
A novel multicell DC-AC converter for applications in renewable energy systems	H Ertl, JW Kolar, FC Zach IEEE Transactions on industrial Electronics 49 (5), 1048-1057	215	2002
Analytical calculation of the RMS current stress on the DC-link capacitor of voltage-PWM converter systems	JW Kolar, SD Round IEE Proceedings-Electric Power Applications 153 (4), 535-543	214	2006
Model for power cycling lifetime of IGBT modules-various factors influencing lifetime	R Bayerer, T Hermann, T Licht, J Lutz, M Feller Integrated Power Systems (CIPS), 2008 5th International Conference on, 1-6	199	2008
Accurate power loss model derivation of a high-current dual active bridge converter for an automotive application	F Krismer, JW Kolar IEEE Transactions on Industrial Electronics 57 (3), 881-891	197	2010
The essence of three-phase PFC rectifier systems—Part I	JW Kolar, T Friedli IEEE Transactions on Power Electronics 28 (1), 176-198	183	2013
Performance optimization of a high current dual active bridge with a wide operating voltage range	F Krismer, S Round, JW Kolar Proc. 37th IEEE PESC, 1-7	183	2006
Core losses under the DC bias condition based on Steinmetz parameters	J Muhlethaler, J Biela, JW Kolar, A Ecklebe IEEE Transactions on Power Electronics 27 (2), 953-963	180	2012
A modified direct power control strategy allowing the connection of three-phase inverters to the grid through \$ LCL \$ filters	LA Serpa, S Ponnaluri, PM Barbosa, JW Kolar IEEE Transactions on Industry Applications 43 (5), 1388-1400	178	2007
A general scheme for calculating switching-and conduction-losses of power semiconductors in numerical circuit simulations of power electronic systems	U Drofenik, JW Kolar Proceedings of the 2005 International Power Electronics Conference (IPEC'05 ...	178	2005
